

DENTISTRY IN ONE PAGE, HOW ABOUT THAT FOR AMAZING??

Your pet needs a dental cleaning

Your pet *could stand* a dental cleaning

Your pet just needs dental exercise

Too frail to benefit from a dental.

If Your pet's not a candidate for dental scaling or extractions we can offer:

1. LEBA III
2. Antibiotics as needed for severe infections and bad breath
3. OXYFRESH in their water and on their gums
4. Deramax for gum inflammation and gingivitis

LEBA III Dissolves Tartar in old dogs too frail for dental scaling under anesthesia. It's a drop / spray used topically. Easy.

...OR SAVE A TON OF TIME AND JUST GET A DENTAL CLEANING and GET IT OVER WITH:

Dental Cleaning

1. They come in the morning on an empty stomach.
2. Old timers get bloodwork to make sure they can get through the process with good organ function.
3. We clean all their teeth and remove the rotten and loose ones.
4. They go home the same day.

BEEF BONES PREVENT DENTAL DISEASE AND REMOVE MODERATE TARTAR

All about **bones** and which ones to use and how to use them and how to make them **SAFE** and enticing.

"I don't have time to mess with bones, and drops, and water additives. What's the fastest way to healthy mouths?"

A Dental Scaling with Extractions if Needed.

WHY SHOULD YOU EVEN CARE? THE DOG ISN'T A RUNWAY MODEL!

LONGEVITY IS DRASTICALLY IMPACTED BY A BAD MOUTH.

IS DENTAL CLEANING SAFE?

At Johnson Veterinary Services, we have never lost a dog during a dental cleaning or prophy ever, not since ever. We opened in 1996. Anesthesia has been carefully crafted here at JVS and we use "by-far-the-best" and safest anesthetic protocol designed by **Dr David Reeves at University of GA.**

FACTS: If you feed *dry* food without anything on it, and you give regular scrapey dental exercise like beef bones or antlers, and you start them young and **KEEP TARTAR OFF**, you may never need a dental prophy / cleaning... nor extractions.

For everyone else, a dental scaling / prophy is essential about every 4-5 years.

DOES MY DOG NEED A DENTAL CLEANING EVERY YEAR? SOME VETS ARE RECOMMENDING THAT.

No. *Nobody's* dog needs a dental cleaning very year. Nobody. It's not about HOW THE TEETH LOOK it's all about **HOW THE GUMLINE is faring against germs and pressure.**
