

Salts and Soaks

To soak a dog or cat's foot, mix up epsom salts in a gallon jug. That way you've got enough for several soaks.

Put some epsom solution in a gallon ziploc. (They're tough) If you want, pre-warm the solution in the microwave.

Simply hold the baggie full of epsom solution on the foot for at least 5 minutes. More than 10 minutes is unnecessary. Pet can move foot without spilling a bowl.
