

<p>“My dog won’t chew ANYTHING” Well, okay.... Once upon a time a woman came in with a really old dog with amazing shiny old teeth. “How did you manage that?!” I asked. “LEBA III” She said.</p>		<p>Sold with a dropper and a “spray top” to get it in the dog’s mouth. Clients sometimes give a treat and when they open the mouth for the treat they just spritz it in the mouth. Or put the dropper in the cheek. Works well, takes months.</p>	<p>QR to LEBA III</p> 
<p>“It’s Hard to Pill My Pet!” Often in fact, this is true and you can use these “Delectables” for help. Pill, plus Delectables Bisque in a little food and BOOM.</p>	<p>QR Code to Delectables</p> 		<p>Some pets love these so much they’ll take a pill mashed up, or just dropped in one. Or mash up the pill in these, and use a syringe. Or poke the pill down, and help it slide down with this.</p>
<p>Home Cook For Your Dog Egg and Whey Protein Sweet Potato Mixed Veggies Vitamins Egg shell</p>	<p>Cooking for your dog is easier than you thought. This diet, plus a beefshank to exercise their teeth, and they’re getting the best nutrition you can make.</p>		<p>ALL THE HOME COOKING DETAILS</p>
